Muhammad Anees

AI Engineer | Agentic AI & LLM Systems | AI Automation

github.com/AneesTeevino | linkedin.com/in/anees-teevino | aneeskhanteevino12@gmail.com | +92 344 1672985

Summary

AI Engineer specializing in LLM-powered applications, Agentic AI workflows, and RAG systems. Experienced in deploying multi-model AI services (OpenAI, Claude, Gemini, Groq) on production backends built with Python, FastAPI, and Node.js. Skilled in prompt and context engineering, semantic search, vector databases, and n8n automation, turning business requirements into scalable AI products.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL
AI & LLM Frameworks: LangChain, LangGraph, CrewAI, AutoGen, OpenAI, Gemini, Claude (Anthropic), Groq APIs, Ollama
AI Technologies: Prompt & Context Engineering, Agentic AI, Multi-Agent Collaboration, Tool Calling, RAG, Embeddings, Semantic/Vector Search, LLM Orchestration, Recommendation Systems
Automation & Backend: n8n, FastAPI, Node.js, Express.js, REST APIs, Microservices, OAuth, Webhooks
Databases: MongoDB, PostgreSQL, MySQL, FAISS, Supabase pgvector
Frontend, DevOps & Tools: Next.js, React.js, Tailwind CSS, ShadCN UI, Docker, Git & GitHub, GitHub Copilot, VS Code, Windsurf

Work Experience

AI Engineer Mar 2026 – present
The Deft Crew (TDC)
- Architected an AI Resume Builder (LLM content generation, ATS scoring, PDF generation) and an AI Career Assistant orchestrating OpenAI, Gemini, Claude, and Groq via a unified API.
- Built and deployed a standalone AI Chat Service (Node.js, TypeScript) with intelligent request routing across a multi-model architecture.
- Designed a Knowledge Sync Pipeline and MongoDB-backed RAG pipelines with semantic search, improving response grounding.
- Applied prompt and context engineering to reduce hallucination; built agent-based workflows and recommendation systems.

Web Development Intern 2024
MUET FM 92.6
- Built and deployed a full-stack, responsive website for the university radio station with live broadcast integration.

Key Projects

AI Resume Builder | *Python, FastAPI, OpenAI, Gemini, Claude, Groq, MongoDB, RAG* 2026
- Multi-model LLM platform with RAG-based role-specific rewriting, ATS scoring, and PDF generation.

AI Career Assistant | *Python, FastAPI, LLMs, MongoDB, OpenAI, Gemini, Claude* 2026
- Conversational assistant for job recommendations and career roadmaps across multiple LLM providers.

TDC AI Chat Service | *Node.js, TypeScript, MongoDB, REST APIs, Microservices* 2026
- Standalone chat microservice with intelligent routing, multi-model integration, and knowledge sync.

Pakistan Travel RAG System | *FastAPI, FAISS, Vector Search, RAG, Embeddings* 2025
- FAISS semantic search over destination, hotel, and activity data for context-aware travel itineraries.

Pakistani Legal Assistant | *Python, FastAPI, React, Gemini API, RAG* 2025
- Citation-grounded RAG legal guidance across five law domains with confidence scoring and source attribution.

PakWheels AI | *FastAPI, FAISS, Sentence Transformers, Groq, LLaMA 3* 2025
- Semantic search over 77,000+ car listings with FAISS and Groq LLaMA 3 for sub-second natural language queries.

Education

B.S. Artificial Intelligence Jul 2023 – Aug 2027
Mehran University of Engineering & Technology (MUET), Jamshoro, Sindh *CGPA: 3.38 / 4.00*

Certifications

Google — Discover the Art of Prompting | *Coursera* 2025
